### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The following is a statement to reasons for the indication of allowable subject matter. The instant application discloses a receiver for detecting an approximate value of the power of a reception signal. Prior art references show similar methods but fail to teach: **"first operation means for adding a value obtained by multiplying a smaller one of a component I and a component Q of the reception signal by 1/8 and a value of a larger one of the components I and Q", as in claims 1, 3 and 5; "a 3-bit, 1-bit, 2-bit, shift registers; and a second comparator for comparing an output value from a first adder and an output value from a second adder to determine which one of these values is larger of smaller and output the value of the larger one as an approximate value of the power of the reception signal", as in claims 2, 4 and 6; "approximate equations that are different from each other and each include at least one bit shift operation, at least one add or subtract operation to calculate from the same reception signal", as in claim 9.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
